MEMORANDUM FOR: Project Director

SUBJECT : LAND, Edwin H.
(Physical Security Survey)

1. This is to advise that the Office of Security recently completed a technical survey of Dr. Land's office in Cambridge, Massachusetts following the completion of extensive modification to said premises. This activity was conducted at the request of Dr. Land inasmuch as his office facilities are used on numerous occasions for the purpose of discussing programs of interest to Project AQUATONE and/or CIA.

2. The results of this survey indicate some minor security hazards which are to be brought to the attention of Dr. Land. In the opinion of the report the existing hazards would not require a cancellation of any currently scheduled meetings utilizing these premises.

3. Should it be of interest to you, the survey report would be made available upon request. This is the third such survey conducted at the request of Dr. Land, the two previous surveys being conducted at his Massachusetts residence and his California residence. All reports are currently filed in the Security Office.
